

Instructions provided by Richard Ways (Army Publishing Directorate) 30 August 2011

Users must be using the LF 3.5.1.123 Viewer, the ix file will not work for any other version of LF or PureEdge.

- 1) Navigate to the Viewer install directory. c:\Program Files\IBM\Lotus Forms\Viewer\3.5\API\76\system
- 2) Rename the se\_cryptoapi.ifx to se\_cryptoapi.ifxORIGINAL
- 3) Move this file out of the system directory to the desktop by cutting and pasting
- 4) Copy and paste this new se\_cryptoapi.ifx to the system directory c:\Program Files\IBM\Lotus Forms\Viewer\3.5\API\76\system
- 5) Start the Viewer and retest the signature
